

DuraGlo Night Sight Paint Instructions

1. Degrease the area to be coated with TruStrip Cleaner/Degreaser.
2. Remove any coating already on the sight with sandpaper.
3. If using DuraGlo Base Coat, mix 12 parts DuraGlo Base Coat with 1 part Hardener. Using an airbrush or a small artists brush, apply the Base Coat. Allow this to dry about an hour.
4. Use an airbrush or small artists brush to apply the DuraGlo. **The DuraGlo Night Sight Paint does not require Hardener!**
5. Allow to dry a few hours before using.
6. Activate the DuraGlo by placing in direct light for at least 20 minutes.
7. Take the sight in a dark room or closet and see the results!
It's that easy!
